## Major Academic Plan (MAP) for Catalog Year 2021-2022

The catalog is the final authority on CATC and major requirements; this is intended as a tool for planning purposes. Student course sequencing may vary depending on course offerings and other variables.

Notes or Special Guidance for Majors:

- \* Course has prerequisite
- <sup>F</sup> Fall only course
- <sup>s</sup> Spring only course

<sup>1</sup>Classes that meet CATC tags: MATH 231 (AAQR), PHYS 231 (SP)

<sup>2</sup> CHEM 294 has two distinct courses that should be taken in order: first the fall course, followed by the spring course

<sup>3</sup>A big difference between the Basic Major and the Biochemistry Emphasis major is one can get by with only one semester of calculus and take algebra-based physics (PHYS 221/2). Beyond that, there are no electives in the major, other than which one of the two Adv. Analytical courses is taken: CHEM 455 or CHEM 457.
